

To Whom It May Concern:

I have been a devoted K-Love listener for eight-teen months (18). Through the ministry of K-Love I have been able to overcome obstacles that two years ago, I would have handled in a negative manner. This is why I support K-Love financially by a monthly pledge.

I am able to listen to K-Love in my car on the way to and from work, at home when I need something to fill a void and with my family when we are together. There are no worries of crude or sexual jokes and humor, no worries of being offended by someone's point of view and no commercials to interfere with my listening pleasure.

The music that is played on K-Love is positive, encouraging and uplifting. There is a sense of a higher power and spirituality that I receive when I listen to K-Love.

Whether or not a person believes in God, the music doesn't preach to people, but it does send that positive message that lets people know that there are things out there worth feeling good about. The music that K-Love plays is a prime example. This society needs that. This society needs to have easy access to an incredible message about positive things and not crude humor. This society needs to have easy access to current events that impact our communities and society that are not made available by secular radio stations. This society needs a radio station that is listener supported, that doesn't support advertisement of secular business and gives encouragement to people in a time of need.

K-Love offers that, and to make that resource unavailable to our society would be detrimental.

Thank you and God Bless
